

7/31/70

Dear Dick,           also HR

No added comment on your 7/27 to Howard. However, in the absence of any real questioning of Riberts, although I have and do credit his testimony, questions about it do remain, unanswered because they were unasked.

There is something else you do not understand about billygoats. The waste of sperm is more apparent than real. Their supply is a marvel, and if it were not put to no use this way there'd be no other use for it, all that can be accomodated serving the intended purpose. Now you have intelligence the value of which you can compare with the Tiberian myserty.

Thanks for the help with the suits. No word since last comment. I go to DC on them Monday.

By now you should have received both the clippings and the pix. It has been too hot to go to the photo store in the afternoon and he opens too late in the morning, so I've not sent Howard's.

The Gamemaster is .35. I've spoken to the rangemaster, who thinks he can move, but haven't taken it to him pending hearing from you. I presume this is designed for heavier but closer work.

With Charach both possibilities apply. At least one of his witnesses is as undependable as they come.

My Nichols comments were less than my fears. Time only will tell, one of the reasons for my unhappiness with Bud's delays. He's hung up on many things, as who isn't?

Look forward to the Playboy playing around. With their money and circulation and willingness to touch aspects, it not crux, how tragic all the money goes to finks and the attention to whores or undependables.

To call Newman a sycophant may be inadequate, though that he is. Someone is sending me a copy of his book. Would I love to tangle with him sometime, with a good audience! (And tell him where the Archives is.)

Another, still encouraging note from Mayhew.

Sincerely,
